## **CLARIFICATION N. 1**

### **Expression of interest in participating in the Energy Center initiative.**

#### **Question:**

in relation to the the public announcement of the expression of interest published on Politecnico website , I would like to ask for a clarification: with reference to the spaces to be assigned (mq.45), which is the maximum area for each of the spaces to be assigned, if necessary, categorized according to typology (basement level, first floor for laboratory use, upper floors for offices)?

#### **Answer:**

The parties interested in submitting the expression of interest, while defining the collaboration project, must express their own requests in relation to the estimated size of the spaces, if possible in details. The Scientific Committee in charge of assessing the expressions of interest submitted, will decide on the possibility for the spaces to be assigned or not.
